- The resumption in activities at Forcados Terminal has significantly improved Crude oil evacuation & Lifting and enhances NNPC/NPDC performance in May, 2017.
- The GMD signed performance bonds tagged the Corporate scorecard Key Performance Indicators (KPIs), with the Chief Operating Officers (COOs) of the five (5) ABUs and two (2) Services Directorates to enhance the Corporation's performance for the benefit of all stakeholders.
- NNPC's Coast-to-coast Strategic intervention has sent Diesel Price crashing by 42%. In May, 2017 AGO retail prices rally between ₦175 to ₦200 per litres, first ever in the recent time.

N175/L

Diesel (AGO)

Diesel prices spiked in Q1 2017 up to N300/L as a result of a diesel supply crisis primarily due to the inability of Marketers to access forex to import the product. Forex accessibility was difficult due to its volatility and unavailability

NNPC embarked on key strategic intervention steps to ease the supply crisis and alleviate its negative impact on the Nigerian people. Key steps taken include, boosting of supply from the domestic refineries, accelerated revamp of critical supply infrastructure amongst other steps as indicated above

NNPC's strategic intervention in the diesel supply and price crisis drastically eased the supply situation which resulted in a dramatic 42% crash in diesel price by May 2017

NNPC Wishes to assure the general public that the Corporation would continue to ensure seamless supply and distribution of diesel and other petroleum products across the country to make the lives of Nigerians better.
